

Steel Scaffolding Plank With Hook Metal Board Steel Plank Without Hook

Our Product Introduction

for more products please visit us on bythaiscaff.com

Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS ISO
- Model Number: BT204
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: L/C, T/T

Product Specification

- Application: Scaffolding
- Materials: Q195, Q235, Q355B
- Standard: EN12811, BS1139.
- Surface: Pre-galvanized, Hot Dipped Galvanized, Black
- Highlight: **Q195 Steel Scaffolding Plank, Galvanized Steel Scaffolding Plank, Hook Steel Staging Plank**

Product Description

Steel Plank With Hook Metal Board Steel Plank Without Hook

Product Details

steel plank with hook

scaffolding board

Materials:Q195.Q235.Q355B

Standard:EN12811.BS1139.

Surface:Pre-galvanized,Hot dipped galvanized,Black

Packing:bulk,in bundle,in tray.

Side box:insert box,outside box.

Support:plain,box

Specification(mm)	Width(mm)	Thickness(mm)	Length(mm)	Hook(mm)	Surface treatment
210*45	210	1.5	1500	43/50	Pre-G/HDG
	210	1.5	1800	43/50	Pre-G/HDG
	210	1.5	2000	43/50	Pre-G/HDG
240*50	240	1.5	1500	43/50	Pre-G/HDG
	240	1.5	1800	43/50	Pre-G/HDG
	240	1.5	2000	43/50	Pre-G/HDG
250*50	250	1.5	1500	43/50	Pre-G/HDG
	250	1.5	1800	43/50	Pre-G/HDG
	250	1.5	2000	43/50	Pre-G/HDG
230*63	230	1.8	1219	43/50	Pre-G/HDG

Scaffolding steel plate is a very important construction accessory, mainly used to build scaffolding and provide safe support for high-altitude operations. Our product is made of hot-dip galvanized material, which has excellent anti-corrosion performance and load-bearing capacity. There are also two options, with and without hooks, to meet the needs of different customers. The following is a detailed introduction for you.

1: Characteristics of hot-dip galvanized materials:

Corrosion resistance: Hot-dip galvanizing can effectively resist moisture in the air and other corrosive media, extending the service life of the product.

I High strength: hot-dip galvanizing is firmly combined with the steel matrix, improving the product's load-bearing capacity.

I Beautiful and durable: Hot-dip galvanized has a smooth surface, beautiful appearance and not easy to rust, maintaining a good appearance of the product.

2: Hook design

The hooked scaffolding steel plate has a unique design. The hook is made of strong steel. The installation method is flexible and diverse. It can easily connect multiple scaffolding steel plates and improve the construction efficiency. The steel plate without hook is suitable for occasions with higher load-bearing capacity, and the two can be used in conjunction with each other.

Durable material: Made of high-quality steel, specially treated to have good corrosion resistance and wear resistance, able to withstand long-term use and repeated loads.

Anti-slip design: The surface of the pedal adopts anti-slip texture or tooth-like design, which effectively improves the stability and safety of workers when standing and reduces the risk of accidental slipping.

Wide applicability: The pedals are standardized in size and can be used with scaffolding frames of various specifications and are suitable for scaffolding systems of different types and sizes.

Easy to install: The design is simple, and the installation is convenient and fast. No professional tools are required, and a safe and reliable scaffolding platform can be quickly built.

Versatile applications: In addition to serving as a standing platform for scaffolding
