

Heavy Duty Steel Supporting Board For Scaffolding Solid Construction

Our Product Introduction

for more products please visit us on bythaiscaff.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT02

Product Specification

- Structure: Solid
- Usage: Scaffolding
- Color: Steel
- Thickness: Customized
- Packaging: Container
- Surface: Pre-galvanized/hot Dip Galvanized
- Edge: Smooth
- Material: Steel
- Highlight: **Scaffolding Steel Supporting Board,
Scaffolding Galvanized Steel Supporting Board,
Customized Scaffolding Steel Supporting Board**

Heavy-Duty Steel Supporting Board For Scaffolding - Solid Construction

Product Description:

Scaffolding Plank is a kind of metal plank typically used as the supporting board for scaffolding. It is made of strong and solid steel with customized width and pre-galvanized/hot dip galvanized surface. It is in steel color and its structure is stable and reliable. It is widely used in construction, repairing or decoration projects for its strong bearing capacity and corrosion resistance. With reliable quality, it can offer long-term and stable performance.

Features:

Product Name: Scaffolding Plank
Length: Customized
Usage: Scaffolding Support Board
Surface: Pre-galvanized/hot Dip Galvanized
Weight: Customized
Width: Customized

Applications:

Bythai BT02 Scaffolding Plank is a perfect solution for all kinds of metal scaffolding projects. It is made of high-quality material and has a smooth edge. It is available in customizable width and thickness, and also comes in pre-galvanized or hot dip galvanized surface. It is a great choice for any metal scaffolding project which requires a strong and durable metal plank.

The Bythai BT02 Scaffolding Plank is perfect for all types of scaffolding projects. It is made of high-quality steel and its surface is pre-galvanized or hot dip galvanized. It has a smooth edge and is available in customizable width and thickness. It can be used for reinforcement of scaffolding structures, for temporary access, for supporting of formwork, and for construction of stairs.

The Bythai BT02 Scaffolding Plank is extremely versatile and can be used in various construction projects. It is ideal for building frameworks, as it is strong and durable. It is also perfect for creating temporary access areas and for supporting formwork. It is also great for creating stairs in scaffolding projects and for reinforcing structures.

The Bythai BT02 Scaffolding Plank is perfectly suited for any scaffolding project. It is made of high-quality steel and its surface is pre-galvanized or hot-dip galvanized. It is available in customizable width and thickness, and its edge is smooth. It is perfect for any scaffolding project which requires a strong and durable metal plank.

Customization:

Scaffolding Plank
Brand Name: **Bythai**
Model Number: **BT02**
Place of Origin: **China**
Color: **Steel**
Surface: **Pre-galvanized/hot Dip Galvanized**
Length: **Customized**
Usage: **Scaffolding**
Width: **Customized**

We provide high quality **scaffolding plank**, the steel planks are made from **steel**, and the surface is treated with **pre-galvanized/hot dip galvanized**, the length and width can be **customized**.
