Product Description:

Japanese Scaffold Accessories With Container Right Angle Design Performance Efficiency

This Scaffolding Coupler is a high quality product made for use in scaffolding, load bearing and other construction projects. It is made of galvanized steel, providing superior strength and stability while also reducing the risk of corrosion. The coupler is designed according to EN74-1 and JIS Standard Couplings, and is available in a right angle shape. The silver color gives it a sleek and stylish look, while the surface treatment offers additional protection against wear and tear. This coupler has a high load capacity and is durable enough to last for many years. The minimum order quantity is 1000 pieces, making it an ideal choice for construction projects of all sizes.
