

Adjustable Scaffold Threaded Rod Scaffold Threaded Rod Connectors

Our Product Introduction

Basic Information

- Place of Origin: china
- Brand Name: bythai
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Delivery Time: 10-15

Product Specification

- Application: Building, Bridge, Tunnel, Etc.
- Color: Silver
- Material: Steel
- Surface Treatment: Hot-dip Galvanized
- Usage: Construction
- Warranty: 2 Year
- Highlight: **Scaffold Threaded Rod Connectors, Scaffold Threaded Rod, Adjustable Scaffold Threaded Rod**

Product Description

Scaffold Threaded Rod Scaffold Threaded Rod Connectors Adjustable Scaffold Threaded Rod

1. Product Overview

Scaffolding screw is a key component used to support and adjust the height of scaffolding. It is usually made of high-quality alloy steel, which has the characteristics of high strength, corrosion resistance and wear resistance. Scaffolding screws are designed and manufactured to provide a solid support structure to ensure the safety and stability of the work platform.

2. Main features

High-strength material: The scaffolding screw is made of high-quality alloy steel material. It has been precision processed and heat-treated to have excellent strength and durability, ensuring that it will not deform after long-term use in complex environments.

Corrosion-resistant coating: The surface is specially treated and covered with a corrosion-resistant coating, making it resistant to harsh weather and chemical corrosion and extending its service life.

Precision thread design: The thread design of the screw is precise to ensure that the lifting process of the scaffold is smooth and the load-bearing capacity of the screw is fully utilized.

Flexible adjustment: The height of the scaffold screw can be easily adjusted to adapt to different work needs. Its design enables the height of the work platform to be adjusted quickly and safely on the construction site.

3. Applicable fields

Scaffolding screws are widely used in construction, bridge maintenance, shipbuilding and other fields. As one of the core components of the scaffolding system, the quality and performance of the screw are directly related to the stability and safety of the entire scaffolding.

4. Security

To ensure users' construction safety, our scaffolding screw products comply with international and industry standards and undergo strict quality control and testing. Detailed operating instructions are provided to ensure that users use and maintain the scaffolding system correctly.
