

Building Galvanised HDG Pipes For Durability Hot Dipped Galvanised Scaffold Tube

Our Product Introduction

for more products please visit us on bythaiscaff.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Diameter: 48.3mm
- Yield Strength: 245N/mm²
- Material: Galvanised Steel
- Application: Scaffolding
- Tensile Strength: 420N/mm²
- Surface Treatment: Galvanised
- Thickness: 3.2mm
- Name: Galvanised Scaffold Tube
- Highlight: **Building Galvanised HDG Pipes,
Building Galvanised Scaffold Tube,
Hot Dipped Galvanised Scaffold Tube**

Galvanised HDG Pipes For Durability Hot Dipped Galvanized Pipes

Product Description:

Galvanised Scaffold Tube - The Ultimate Choice for Building Scaffolding

Galvanised Scaffold Tube is a high-quality, durable and corrosion-resistant product made from galvanised steel. With a yield strength of 245N/mm², it is strong enough to withstand heavy loads and provide a safe and secure platform for construction workers.

Product Description

Galvanised Scaffold Tube, also known as GI pipe or hot dipped galvanised pipes, is widely used in the construction industry for building scaffolding. It is manufactured according to the EN39 standard, ensuring its quality and reliability.

Superior Strength and Durability

Our Galvanised Scaffold Tube is renowned for its high strength and durability. With a yield strength of 245N/mm², it can withstand heavy loads and provide a stable platform for workers to perform their tasks without any worries.

Corrosion-Resistant

The galvanisation process involves coating the steel with a layer of zinc, making it resistant to corrosion. This makes our Galvanised Scaffold Tube a reliable and long-lasting choice for construction projects, even in harsh and corrosive environments.

EN39 Standard

Our Galvanised Scaffold Tube meets the EN39 standard, which is a European standard for steel tubes used in scaffolding. This ensures that our product is of the highest quality and meets all safety and performance requirements.

Optimal Thickness

The Galvanised Scaffold Tube has a thickness of 3.2mm, making it strong and durable enough to handle heavy loads while still being lightweight and easy to handle. This optimal thickness also ensures the safety and stability of the scaffolding structure.

Conclusion

In conclusion, Galvanised Scaffold Tube is the ultimate choice for building scaffolding. With its high strength, durability, corrosion resistance, and compliance with the EN39 standard, it provides a safe and reliable platform for construction workers. Choose our Galvanised Scaffold Tube for your next construction project and experience the difference in quality and performance.

Features:

Product Name: Galvanised Scaffold Tube

Name: Galvanised Scaffold Tube

Diameter: 48.3mm

Material: Galvanised Steel

Yield Strength: 245N/mm²

Application: Scaffolding

STK 500 pipes

EN36/BS1139 steel pipe

3.2 thickness steel pipe

Technical Parameters:

Attribute	Value
Surface Treatment	Galvanised
Tensile Strength	420N/mm ²
Thickness	3.2mm
Yield Strength	245N/mm ²
Diameter	48.3mm
Application	Scaffolding
Weight	6.4kg/m
Material	Galvanised Steel
Name	Galvanised Scaffold Tube
Standard	EN39
Keywords	scaffold tube, galvanized scaffolding pipe tube, hot dip galvanized scaffolding steel tube stamped with EN39

Applications:

Galvanised Scaffold Tube | Bythai Scaffolding

Bythai Scaffolding's Galvanised Scaffold Tube is the perfect solution for all your construction and maintenance needs. Made from high-quality galvanised steel, our scaffold tubes are durable, strong and corrosion-resistant, making them the ideal choice for use in various applications.

Our tubes are available in various sizes and thicknesses, with the most popular being the 48mm galvanized scaffold tube. It has a thickness of 3.2mm, ensuring strength and stability in any construction project. Our tubes are also available in other sizes and thicknesses to suit your specific requirements.

At Bythai Scaffolding, we understand the importance of safety in any construction site. That's why our Galvanised Scaffold Tubes undergo rigorous testing and certification by SGS, a leading international inspection, verification, testing and certification company. This ensures that our tubes meet the highest quality and safety standards.

Our Galvanised Scaffold Tubes are proudly made in China, reflecting our commitment to providing high-quality products at competitive prices. We believe in offering the best value for your money, and our tubes are priced between \$5 to \$18, making them affordable for various projects.

Our tubes are carefully packaged in bundles for easy transportation and storage. This also ensures that they remain in perfect condition during transit, reducing the risk of any damage. We guarantee a fast delivery time of 7-15 days to ensure that your project stays on schedule.

With our flexible payment terms of TT/LC, we make it easy for you to purchase our Galvanised Scaffold Tubes. We also have a supply ability of 1000 tons per month, ensuring that we can meet your demands and deadlines.

Our Galvanised Scaffold Tubes are not only strong and durable, but they also have a high yield strength of 245N/mm² and a tensile strength of 420N/mm². This makes them ideal for use in various construction applications, such as:

Building and maintenance of high-rise structures

Construction of bridges and tunnels

Scaffolding for industrial and commercial buildings

Temporary structures for events and festivals

Support structures for film and TV productions

And many more!

We also offer a range of scaffold tube couplers and fittings, including the popular bs1139 scaffolding tubes, to make assembling and disassembling your scaffolding system quick and easy. Our galvanized scaffolding tubes and fittings are designed to fit seamlessly, ensuring a safe and secure structure for your workers.

Brand Name	Bythai Scaffolding
Model Number	BT01

Galvanised Scaffold Tube - Customization Service

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Thickness: 3.2mm

Yield Strength: 245N/mm²

Weight: 6.4kg/m

Surface Treatment: Galvanised

Application: Scaffolding

Customization Options:

Scaffold tube caps with customized logo

Scaffolding tubes galvanized according to customer's specifications

Support and Services:

Galvanised Scaffold Tube Technical Support and Services

Thank you for choosing Galvanised Scaffold Tube. Our team is dedicated to providing you with the highest quality products and services to ensure your construction projects are completed safely and efficiently.

Technical Support

Our technical support team is available to assist you with any questions or concerns you may have regarding the installation and use of Galvanised Scaffold Tube. We offer comprehensive support through various channels, including phone, email, and online chat, to provide you with immediate assistance.

In addition, we provide detailed product manuals and instructional videos to guide you through the proper assembly and use of our scaffold tubes. Our team is also available for on-site support and training upon request.

Quality Assurance

At Galvanised Scaffold Tube, we are committed to providing you with the highest quality products. Our tubes undergo rigorous testing and inspection to ensure they meet industry standards and regulations. We use only the best materials and manufacturing processes to produce durable and reliable scaffold tubes.

In the rare event that you encounter any issues with our products, our team will work diligently to resolve them and provide you with a satisfactory solution.

Customisation Services

We understand that every construction project is unique, and one size does not fit all. That's why we offer customisation services to tailor our scaffold tubes to your specific needs. Our team of experts will work closely with you to understand your requirements and provide you with a customised solution that meets your project's demands.

Training and Education

We believe that proper training and education are crucial to ensuring the safe and effective use of our products. That's why we offer training and educational programs for our customers to ensure they have the necessary knowledge and skills to use our scaffold tubes correctly.

Our training programs cover topics such as proper assembly and disassembly, safety guidelines, and maintenance procedures. We also provide educational materials and resources to keep you updated with the latest industry standards and regulations.

Conclusion

At Galvanised Scaffold Tube, we are dedicated to providing you with superior products and services. Our team is committed to meeting your needs and exceeding your expectations. If you have any questions or require any assistance, please do not hesitate to contact us. We are here to support you every step of the way.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Bythai Scaffolding.

Q: What is the model number of this product?

A: The model number of this product is BT01.

Q: Where is this product manufactured?

A: This product is manufactured in China.

Q: Does this product have any certification?

A: Yes, this product is certified by SGS.

Q: What is the price range of this product?

A: The price range of this product is \$5-\$18.
