- Material: Steel
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Highlight: **Scaffolding Plank For Construction,
Steel Catwalk Scaffold,
Hooks Steel Scaffolding Plank**

Product Description

Product Description:

Scaffolding Plank For Construction Steel Plank With Hooks Steel Catwalk Scaffold

Scaffolding Plank Product Overview

Scaffolding Plank is a versatile and essential product for the construction industry. It is a type of scaffolding board that is used as a platform for workers to stand on while working at heights. Made from high-quality steel, these planks are durable, strong, and reliable, making them a preferred choice for scaffolding systems.

Material

The Scaffolding Plank is made from steel, a strong and sturdy material that can withstand heavy loads and harsh weather conditions. The use of steel ensures the durability and safety of the scaffold, making it suitable for use in various construction projects.

Length

The length of the Scaffolding Plank can be customized according to the requirements of the project. This makes it suitable for use in different types of scaffolding systems, including single and double scaffolding, cantilever scaffolding, and suspended scaffolding.

Usage

The primary usage of the Scaffolding Plank is in scaffolding systems. It provides a stable and secure platform for workers to perform their tasks at various heights. It is an essential component of construction scaffolding and is used in building, maintenance, and repair projects.

Packaging

The Scaffolding Plank is packaged in containers, making it easy to transport and store. The containers are designed to protect the planks from damage during transit and ensure that they reach the construction site in perfect condition.

Surface

The Scaffolding Plank is available in three surface finishes: pre-galvanized, hot-dip galvanized, and spray plastic. Pre-galvanized planks have a layer of zinc coating that provides protection against rust and corrosion. Hot-dip galvanized planks have a thicker layer of zinc coating, making them more durable and suitable for use in harsh environments. Spray plastic planks have a layer of plastic coating that adds an extra layer of protection and also makes them more resistant to slips.

Key Features

Scaffolding Plank is a versatile and essential product for the construction industry. Its key features include:

Durable and strong steel construction

Customizable length for different scaffolding systems

Used in various construction projects

Secure packaging in containers for easy transportation and storage

Available in different surface finishes for added protection and safety

In conclusion, the Scaffolding Plank is a vital building material for any construction project. Its sturdy steel construction, customizable length, and various surface finishes make it a reliable and safe option for scaffolding systems. With its secure packaging and versatile usage, it is an essential product for any construction site. Choose Scaffolding Plank for your next construction project and ensure the safety and efficiency of your workers.

Features:

Product Name: Scaffolding Plank

Material: Steel

Surface:

Pre-galvanized

Hot Dip Galvanized

Spray Plastic

Place of Shipment: China

Packaging: Container

Usage: Scaffolding

Key Features:

Pierced steel planking design for extra strength and stability

Made of durable steel material for long-lasting use

Available in various surface treatments for corrosion resistance

Designed without hooks for easy installation and removal

Suitable for use in scaffolding systems for construction and maintenance work

Product Introduction

Brand Name: Bythai

Our scaffolding plank is a high-quality and durable product that is essential for any construction project. Made with galvanized steel, our scaffolding plank is designed to provide a safe and stable platform for workers to perform their tasks. With a strong focus on quality and safety, Bythai is the brand you can trust.

Place of Origin: China

Our scaffolding plank is proudly made in China, known for its advanced manufacturing capabilities and strict quality control measures. We ensure that every plank is produced to meet international standards, providing our customers with a reliable and top-notch product.

Minimum Order Quantity: 1000

As an experienced and established manufacturer, we have the ability to fulfill large orders. Our minimum order quantity is 1000 units, making it suitable for both small and large-scale projects.

Price: 4.5-8.5

Our scaffolding plank is competitively priced at 4.5-8.5 per unit. We believe in providing our customers with the best value for their money without compromising on the quality of our product.

Delivery Time: 10-15

With our efficient production process and strong logistics network, we are able to deliver our products in a timely manner. Our average delivery time for scaffolding plank is 10-15 days, ensuring that your project stays on schedule.

Payment Terms: Container, Shipping

We accept payment via container or shipping, making it convenient for our customers to choose the method that suits them best. Our flexible payment terms reflect our commitment to providing a hassle-free experience for our clients.

Place of Shipment: China

All our products are shipped from our factory in China, ensuring that our customers receive the authentic Bythai scaffolding plank.

Product Usage and Packaging

Usage: Scaffolding

Our scaffolding plank is primarily used in the construction industry, providing a safe and stable platform for workers to carry out their tasks at various heights. It is also commonly used in maintenance and repair work, as well as for temporary structures such as stages and platforms.

Packaging: Container

To ensure the safe transportation of our product, we package our scaffolding plank in containers. This also makes it easy for our customers to transport and store the planks on their construction site.

Length: Customized

We understand that every construction project is unique and may require different lengths of scaffolding plank. Hence, we offer customized lengths to meet the specific needs of our customers.

Surface: Pre-galvanized/Hot Dip Galvanized/Spray Plastic

Our scaffolding plank is available in three different surface finishes - pre-galvanized, hot dip galvanized, and spray plastic. This provides our customers with the option to choose the most suitable finish for their project, depending on the environmental conditions and budget.

Product Features

Strong and durable - Made with high-quality galvanized steel, our scaffolding plank is able to withstand heavy loads and harsh weather conditions.

Safety first - Our scaffolding plank is designed with anti-slip grooves and edges to provide a secure and stable platform for workers.

Easy to assemble - With a simple and efficient design, our scaffolding plank can be easily assembled, saving time and effort on the construction site.

Cost-effective - Our scaffolding plank is competitively priced without compromising on quality, making it a cost-effective choice for construction companies.

Versatile - Our scaffolding plank can be used for various types of construction projects and can be easily adjusted to different heights.

Long-lasting - The galvanized steel material and sturdy construction of our scaffolding plank ensure its longevity, making it a wise investment for any construction company.

Conclusion

Bythai's scaffolding plank is the perfect choice for your construction needs. With its high-quality material, safety features, and customizable options, it is a reliable and cost-effective solution for any construction project. Place your order today and experience the Bythai difference!

Customization:

Bythai - Customized Scaffolding Plank

Usage: Scaffolding

Place of Shipment: China

Customize Your Scaffolding Plank with Bythai

Looking for a reliable supplier of scaffold walking boards? Look no further than Bythai. Our BS12811 steel plank is the perfect solution for your scaffolding needs. With our customization service, you can tailor the length and specifications of the steel scaffold plank to fit your specific requirements.

Our scaffolding plank is made of high-quality steel, ensuring durability and safety on the job site. It is suitable for various construction projects and can withstand heavy loads.

Don't settle for standard sizes and lengths, get a customized scaffolding plank from Bythai. With a minimum order quantity of 1000 pieces and competitive prices, we are your go-to supplier for all your scaffolding needs. Contact us now to place your order.

Packing and Shipping:

Scaffolding Plank Packaging and Shipping

Packaging:

The Scaffolding Plank will be packaged in strong and durable cardboard boxes to ensure safe transportation. Each box will contain 50 pieces of planks, securely stacked and wrapped with protective materials to prevent any damage during shipping.

The boxes will also be labeled with the product name, quantity, and handling instructions to guide the delivery personnel and avoid mishandling.

Shipping:

The Scaffolding Plank will be shipped using a reliable and trusted delivery service to ensure timely and safe arrival. The shipping cost will be calculated based on the weight and destination of the order.

For international shipping, necessary customs declarations and documentation will be included to comply with the regulations of the receiving country.

Once the order is shipped, the customer will receive a tracking number to track the delivery status and estimated arrival date of their package.

For any inquiries or concerns regarding packaging and shipping, please contact our customer service team for assistance.
