

## High-Performance Scaffold Tube 48.3mm Diameter galvanised scaffold tube

Our Product Introduction

for more products please visit us on [bythaiscaff.com](http://bythaiscaff.com)

### Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

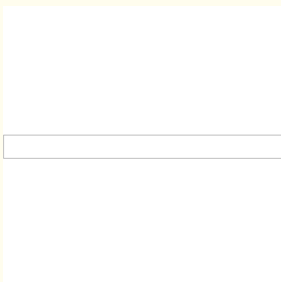

### Product Specification

- Name: Galvanised Scaffold Tube
- Thickness: 3.2mm
- Material: Galvanised Steel
- Application: Scaffolding
- Weight: 6.4kg/m
- Tensile Strength: 420N/mm<sup>2</sup>
- Diameter: 48.3mm
- Surface Treatment: Galvanised

### Product Description:

Galvanised Scaffold Tube - The Ultimate Choice for Construction

If you are looking for a strong, durable and versatile scaffold tube for your construction needs, look no further than Galvanised Scaffold Tube. Made from high-quality steel and pipe, our scaffold tubes offer superior strength and stability, making them the top choice for construction projects of all sizes.

Surface Treatment - Galvanized for Maximum Protection

Our Galvanised Scaffold Tubes are treated with galvanization, a process that coats the steel with a layer of zinc to provide maximum protection against corrosion. This ensures that our scaffold tubes can withstand harsh weather conditions and last for a longer period of time, making them a cost-effective choice for any construction project.

Product Specifications

**Name: Galvanised Scaffold Tube**

**Diameter: 48.3mm**

**Tensile Strength: 420N/mm<sup>2</sup>**

**Yield Strength: 245N/mm<sup>2</sup>**

The Benefits of Galvanised Scaffold Tubes

Choosing Galvanised Scaffold Tubes for your construction needs comes with a host of benefits:

**Durable:** Our scaffold tubes are made from high-quality steel and pipe, making them strong and long-lasting.

**Corrosion Resistance:** The galvanization process ensures that our scaffold tubes are highly resistant to corrosion, making them ideal for outdoor use.

**Safety:** With their superior strength and stability, our scaffold tubes provide a safe working environment for construction workers.

**Load-Bearing Capacity:** Our scaffold tubes have a high load-bearing capacity, making them suitable for supporting heavy weights.

**Versatility:** Our scaffold tubes can be used for various construction purposes, such as building scaffolds, temporary structures, and more.

Choose Galvanised Scaffold Tube for Your Construction Project

In conclusion, Galvanised Scaffold Tube is the ultimate choice for construction projects of all sizes. With its galvanization treatment, durable construction, and high load-bearing capacity, it ensures safety, strength, and stability for any construction project. So why wait? Choose Galvanised Scaffold Tube for your next construction project and experience the difference for yourself!

### Technical Parameters:

Technical Parameters	Value
Name	Galvanised Scaffold Tube
Application	Scaffolding
Diameter	48.3mm
Thickness	3.2mm
Material	Galvanised Steel
Surface Treatment	Galvanised
Standard	EN39
Tensile Strength	420N/mm <sup>2</sup>
Yield Strength	245N/mm <sup>2</sup>
Weight	6.4kg/m

Product Description

The Galvanised Scaffold Tube is a type of pipe scaffold tube that is commonly used in the construction industry. It is made of galvanised steel, which makes it durable and resistant to corrosion. This tube has a diameter of 48.3mm and a thickness of 3.2mm, making it suitable for various scaffolding applications.

Key Features

**High Tensile Strength: 420N/mm<sup>2</sup>**

**Application: Scaffolding**

**Surface Treatment: Galvanised**

**Name: Galvanised Scaffold Tube**

**Yield Strength: 245N/mm<sup>2</sup>**

**Thickness: 3.2mm**

**Material: Galvanised Steel**

**Weight: 6.4kg/m**

**Standard: EN39**

**Diameter: 48.3mm**

Benefits

**Durable and long-lasting**

**Resistant to corrosion**

**Easy to assemble and disassemble**

**Lightweight and easy to transport**

**Can be used for various scaffolding applications**

Pricing

The scaffolding tube price may vary depending on the quantity ordered and the supplier. However, the galvanized pipe scaffolding is generally cost-effective and offers great value for its durability and versatility.

## Applications:

Galvanised Scaffold Tube - Bythai Scaffolding

Product Overview

Bythai Scaffolding's Galvanised Scaffold Tube (model number: BT01) is a high-quality, durable and cost-effective scaffolding system that is widely used in the construction, building and maintenance industries. Made in China, this product is certified by SGS and adheres to the EN39 standard.

Product Attributes

<b>Brand Name</b>	Bythai Scaffolding
<b>Model Number</b>	BT01
<b>Place of Origin</b>	China
<b>Certification</b>	SGS
<b>Price</b>	\$5-\$18
<b>Packaging Details</b>	In bundles
<b>Delivery Time</b>	7-15 days
<b>Payment Terms</b>	TT/LC
<b>Supply Ability</b>	1000tons per month
<b>Yield Strength</b>	245N/mm2
<b>Tensile Strength</b>	420N/mm2
<b>Surface Treatment</b>	Galvanised
<b>Application</b>	Scaffolding
<b>Standard</b>	EN39

Product Features

**Stainless Steel Pipe:** Our galvanised scaffold tube is made from high-quality stainless steel, providing superior strength and durability.

**Tube and Coupler Scaffolding System:** This product is designed to be used with a tube and coupler scaffolding system, allowing for easy assembly and versatility in different construction projects.

**Construction, Building and Maintenance:** Our galvanised scaffold tube is suitable for a wide range of applications in the construction, building and maintenance industries.

**Safety and Durability:** With a yield strength of 245N/mm2 and a tensile strength of 420N/mm2, our galvanised scaffold tube offers high load capacity and ensures the safety and durability of your construction projects.

**Cost-Effective:** Bythai Scaffolding's galvanised scaffold tube is a cost-effective solution for scaffolding needs, providing long-term usage and low maintenance costs.

**Corrosion and Weather Resistance:** The galvanised surface treatment of our scaffold tube provides excellent corrosion and weather resistance, making it suitable for both indoor and outdoor use.

Application and Scenario

Bythai Scaffolding's galvanised scaffold tube is widely used in various construction, building and maintenance projects, including:

**High-rise building construction**

**Bridges and tunnels construction**

**Roofing and facade maintenance**

**Industrial and commercial building maintenance**

**Shipbuilding and offshore construction**

Our galvanised scaffold tube can also be used in scenarios where temporary structures are needed, such as events, concerts or outdoor activities.

With its high load capacity, safety, durability, and versatility, Bythai Scaffolding's galvanised scaffold tube is the perfect choice for any construction and maintenance project, providing a strong and reliable support system for workers and equipment.

## Customization:

Galvanised Scaffold Tube - Customization Service

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China  
Certification: SGS  
Price: \$5-\$18  
Packaging Details: In bundles  
Delivery Time: 7-15 days  
Payment Terms: TT/LC  
Supply Ability: 1000tons per month  
Surface Treatment: Galvanised  
Material: Galvanised Steel  
Tensile Strength: 420N/mm2  
Diameter: 48.3mm  
Name: Galvanised Scaffold Tube

Bythai Scaffolding offers customization services for our Galvanised Scaffold Tube to meet your specific needs. Our tube and coupler scaffolding is made from high-quality metal tubing, providing strong and durable support for your construction projects. We can customize the length, diameter, and surface treatment of the metal tubing for scaffolding to fit your requirements. Our scaffolding tubes are galvanised to resist corrosion, ensuring a longer lifespan and safer working environment. With our experienced team and advanced equipment, we can supply Galvanised Scaffold Tubes in bulk with a supply ability of 1000tons per month. Our packaging details are in bundles for easy transportation and delivery within 7-15 days. We accept payment terms of TT/LC for your convenience. Choose Bythai Scaffolding for high-quality and customized scaffolding pipes. Contact us now for more information and a competitive price quote.

## Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping

The Galvanised Scaffold Tube is carefully packaged and shipped to ensure safe and secure delivery to our customers.

### Packaging:

**Each tube is individually wrapped with protective material to prevent scratches or damage during transportation.**

**The tubes are then stacked and secured with high-quality straps to prevent any movement or shifting during transit.**

**For bulk orders, the tubes are packed into sturdy wooden crates for added protection.**

**All packaging materials used are environmentally friendly and recyclable.**

+

### Shipping:

We offer both domestic and international shipping options for our Galvanised Scaffold Tube.

**Domestic orders are shipped via trusted and reliable carriers, such as UPS, FedEx, or USPS.**

**International orders are shipped through our network of trusted freight forwarders to ensure timely and cost-effective delivery.**

**Customers can also arrange for their own shipping and pick up their orders from our warehouse.**

**Tracking information is provided for all orders, and our customer service team is always available to assist with any shipping inquiries.**

+

At Galvanised Scaffold, we are committed to delivering our products to our customers in a timely and efficient manner. We take great care in packaging and shipping our Galvanised Scaffold Tube to ensure they arrive at their destination in perfect condition.

## FAQ:

**Q: What is the brand name of this product?**

**A: The brand name is Bythai Scaffolding.**

**Q: What is the model number of this product?**

**A: The model number is BT01.**

**Q: Where is this product made?**

**A: This product is made in China.**

**Q: Is this product certified?**

**A: Yes, it is certified by SGS.**

**Q: How much does this product cost?**

**A: The price ranges from \$5 to \$18.**

**Q: How is this product packaged?**

**A: It is packaged in bundles.**

**Q: What is the delivery time for this product?**

**A: The delivery time is 7-15 days.**

**Q: What are the payment terms for this product?**

**A: The payment terms are TT/LC.**

**Q: What is the supply ability for this product?**

**A: The supply ability is 1000 tons per month.**
