Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BM205
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping

Product Specification

- Packaging: Container
- Material: Steel
- Length: Customized
- Usage: Scaffolding
- Place Of Shipment: China
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Product Description:

Scaffolding Plank

Product Overview

Scaffolding Plank is a high quality steel plank designed for safe and efficient construction work. Made of durable steel material, our planks are designed to provide a sturdy and reliable platform for workers to stand on during construction process. Our planks are compliant with BS1139 standard, ensuring the highest level of safety and quality for your construction project.

Surface Options

Our scaffolding planks are available in three surface options: pre-galvanized, hot dip galvanized, and spray plastic. Each surface option offers different levels of protection against rust and corrosion, allowing you to choose the most suitable option for your construction site.

Pre-galvanized: This surface option involves a thin layer of zinc coating applied to the steel plank before it is formed into its final shape. This provides some protection against rust and corrosion, making it suitable for use in dry and indoor construction projects.

Hot Dip Galvanized: With this surface option, the steel plank is immersed in a bath of molten zinc, creating a thicker and more durable layer of protection against rust and corrosion. This option is ideal for outdoor construction projects, where the planks are exposed to harsh weather conditions.

Spray Plastic: For added protection and durability, our planks can also be coated with a layer of plastic using a spray coating process.

This option is ideal for construction projects that require frequent movement of the planks, as it provides a strong barrier against scratches and damage.

Customizable Length

We understand that every construction project is unique and may require different lengths of scaffolding planks. That's why we offer customized lengths for our planks, allowing you to choose the most suitable length for your specific project. Our planks can be tailored to meet your exact requirements, ensuring smooth and efficient construction work.

Place of Shipment

All of our scaffolding planks are manufactured in China, ensuring high quality and competitive prices. We have a strict quality control process in place to guarantee that our planks meet BS1139 standard and exceed your expectations. We also offer flexible shipping options to ensure timely delivery to your construction site.

Packaging

Our scaffolding planks are packaged in containers, providing a safe and secure way to transport them to your construction site. Our containers are designed to withstand the rigors of transportation, ensuring that your planks arrive in perfect condition.

Invest in our BS1139 steel plank and experience safe and efficient construction work. Contact us now to learn more about our product and how we can meet your construction needs.

Features:

Product Name: Scaffolding Plank

Length: Customized

Material: Steel

Place of Shipment: China

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Packaging: Container

Material: Steel

The Bythai BM205 scaffolding plank is a versatile and essential product in any construction site. It is designed to provide a strong and stable platform for workers to perform their tasks safely and efficiently.

Application:

The steel frame of the BM205 is specially designed for decking plank, making it a perfect fit for scaffold systems. It can be used in various types of construction projects such as buildings, bridges, and industrial facilities.

Scene:

Imagine a busy construction site where workers are scurrying around, carrying heavy tools and materials. Among the hustle and bustle, you can see the Bythai BM205 scaffolding planks being used as a sturdy platform for workers to stand on while they perform their tasks. These planks are strategically placed on the scaffold system, providing a safe and stable working environment for the workers.

Why Choose Bythai BM205?

Durable: Made with high-quality steel, the BM205 is built to withstand heavy loads and harsh weather conditions.

Easy to Install and Remove: With its lightweight design and easy installation process, the BM205 can be quickly set up and removed, saving time and effort.

Customizable Length: The BM205 can be customized to fit different scaffold system sizes, making it a versatile product for various construction projects.

Cost-effective: With a minimum order quantity of 1000, the BM205 is a cost-effective option for construction companies looking to purchase in bulk.

Shipping and Packaging:

The BM205 is shipped in bundles and packed in containers to ensure safe and secure delivery. It can be shipped from China to any location around the world, making it easily accessible to construction companies globally.

In conclusion, the Bythai BM205 scaffolding plank is a durable, versatile, and cost-effective product that is essential in any scaffolding system. It provides a safe and stable platform for workers to perform their tasks, making it a valuable addition to any construction site.

Customization:

Scaffolding Plank Customization Service

Brand Name: Bythai

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Key Features:

Customized steel planks with hook for scaffolding

Model: BM205

Available in 230mm width

Galvanized steel material for durability

Easy to install and remove with hook design

Customizable length to fit specific project needs

Packaged in bundles for convenient transportation

Fast delivery within 10-15 days

Accepts container and shipping payment terms

Product Description:

Bythai's Scaffolding Planks are customized with hook design for easy installation and removal. Made from high quality galvanized steel, these planks are durable and can withstand heavy loads. They are available in 230mm width and can be customized in length to fit specific project needs. The planks are pre-galvanized or hot dip galvanized, or spray plastic coated for added protection against rust and corrosion. They are packaged in bundles for easy transportation and can be shipped from China. With a minimum order quantity of 1000, these planks are priced at 4.5-8.5 per piece. Delivery time takes only 10-15 days and payment terms include container and shipping. Perfect for construction and building projects, our scaffolding steel planks will provide a safe and stable working platform for workers at height.

Packing and Shipping:

Scaffolding Plank Packaging and Shipping

Our Scaffolding Planks are carefully packaged and shipped to ensure safe arrival and easy handling for our customers. Here is a breakdown of our packaging and shipping process:

Quality Control: Before packaging, each Scaffolding Plank is inspected and tested to meet our high standards of quality and safety.

Protective Packaging: Our Scaffolding Planks are individually wrapped in protective material to prevent any damage during transportation.

Palletizing: Once wrapped, the Scaffolding Planks are stacked on sturdy wooden pallets for easy handling and transportation.

Secure Strapping: The pallets are then securely strapped together to prevent any movement or shifting during transit.

Shipping Options: We offer various shipping options including ground, air, and sea freight to accommodate our customers' needs.

International Shipping: For international orders, we carefully adhere to all customs regulations and ensure proper documentation for a smooth delivery process.

At Scaffolding Co., we take great care in the packaging and shipping of our products to ensure their safe and timely arrival. We are committed to providing the best service to our customers and strive to make the process as convenient and hassle-free as possible. Contact us for more information on our packaging and shipping options.
