Product Specification

- Length: Customized
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Place Of Shipment: China
- Material: Steel
- Packaging: Container
- Usage: Scaffolding

Product Description:

Scaffolding Plank - Product Overview

Our Scaffolding Plank is a reliable and sturdy product designed to provide a safe and efficient working platform for construction workers. It is an essential component in any scaffolding structure, providing a stable base for workers to stand on and perform their tasks with ease. Made of high-quality steel, our scaffolding planks are durable and able to withstand heavy loads. They come with hooks on both ends, providing a secure connection to other scaffolding components. This feature also allows for easy installation and dismantling, saving time and effort for construction workers.

The length of our scaffolding planks can be customized according to the specific needs of your project. This flexibility makes it suitable for various construction sites and allows for a more efficient use of resources.

Our scaffolding planks are manufactured in China, ensuring high-quality production and cost-effectiveness. We have a strict quality control system in place to ensure that each plank meets the required safety standards and specifications.

The surface of our scaffolding planks can be pre-galvanized, hot dip galvanized, or spray plastic coated. This provides protection against rust and corrosion, making our planks suitable for both indoor and outdoor use.

Packaged in containers, our scaffolding planks are easy to transport and store. This makes them a convenient choice for construction projects in different locations.

Our scaffolding planks are also known as steel planks w/hook, steel plank with hooks, or steel staging plank. This is because they are designed with hooks on both ends, making them ideal for use in staging or scaffolding structures.

In summary, our Scaffolding Plank is a versatile and durable product that meets the highest safety standards. With customizable length, high-quality steel material, and various surface options, it is the perfect choice for any construction project in need of a reliable working platform. Contact us today to learn more about our product and how it can benefit your construction project.

Features:

Product Name: Scaffolding Plank

Usage: Scaffolding

Packaging: Container

Material: Steel

Length: Customized

Place of Shipment: China

Features:

Strong and durable steel frame for decking plank

Secure and stable steel planks with hook design for easy assembly

Packing and Shipping:

Scaffolding Plank Packaging and Shipping

Our Scaffolding Plank is carefully packaged and shipped to ensure its safe arrival at your job site.

Packaging:

The planks are wrapped in plastic or bubble wrap to protect them from moisture and damage during transit.

Each bundle of planks is secured with strong strapping to prevent shifting or movement.

The bundles are then placed in sturdy cardboard boxes for additional protection.

For larger orders, the planks are stacked and secured on pallets for easy transportation.

All packaging materials used are recyclable to minimize our environmental impact.

Shipping:

We offer both domestic and international shipping.

Domestic orders are typically shipped via ground transportation, while international orders are shipped by air or sea freight.

We work with trusted shipping carriers to ensure timely and reliable delivery.
Tracking information will be provided so you can monitor the status of your shipment.
For international orders, please note that additional customs fees and duties may apply.
With our careful packaging and reliable shipping, you can trust that your Scaffolding Plank will arrive safely and ready for use.
