

Q235 Scaffolding galvanized pipe manufacturer diameter of scaffold tube scaffolding pipes

Our Product Introduction

for more products please visit us on bythaiscaff.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Tensile Strength: 420N/mm2
- Material: Galvanised Steel
- Application: Scaffolding
- Standard: EN39
- Name: Galvanised Scaffold Tube
- Diameter: 48.3mm
- Thickness: 3.2mm
- Surface Treatment: Galvanised

Product Description:

Galvanised Scaffold Tube - The Ultimate Choice for Strong and Durable Construction Scaffolding

If you're in the market for high-quality, durable and cost-effective scaffolding tubes, look no further than Galvanised Scaffold Tube. Made from high-grade stainless steel and treated with galvanisation, these tubes are the ultimate choice for any construction scaffolding project. Product Overview

Galvanised Scaffold Tube is a premium product that offers superior strength and corrosion resistance, making it the ideal choice for any construction project. With a tensile strength of 420N/mm² and a yield strength of 245N/mm², these tubes are built to withstand heavy loads and tough environments.

With a diameter of 48.3mm and thickness of 3.2mm, these tubes are perfect for use in various scaffolding structures. Whether you're building a simple platform or a complex scaffold system, Galvanised Scaffold Tube is the perfect fit for all your construction needs. Key Features

High Strength: Galvanised Scaffold Tube is designed to provide exceptional strength, making it the perfect choice for heavy-duty construction projects. It can support heavy loads and withstand tough working conditions, ensuring the safety and stability of your scaffolding structure.

Corrosion Resistance: The galvanised surface treatment of these tubes makes them highly resistant to corrosion, even in harsh environments. This ensures the longevity of your scaffolding and saves you the hassle and cost of frequent replacements.

Cost-Effective: Galvanised Scaffold Tube offers excellent value for money. Its long-lasting durability and low maintenance requirements make it a cost-effective option for any construction project.

Why Choose Galvanised Scaffold Tube?

With so many scaffolding tube options available on the market, you may be wondering why you should choose Galvanised Scaffold Tube. Here are some reasons that set us apart from the rest:

High-quality stainless steel material

Superior strength and durability

Corrosion-resistant galvanised surface treatment

Wide range of sizes available to suit your specific needs

Competitive scaffolding tube price

Excellent customer service and support

Don't compromise on the quality and safety of your construction scaffolding. Choose Galvanised Scaffold Tube for a reliable and long-lasting solution.

Order now and experience the difference in the strength, durability, and performance of Galvanised Scaffold Tube. Contact us for a quote or to learn more about our products and services.

Features:

Product Name: Galvanised Scaffold Tube

Material: Galvanised Steel

Tensile Strength: 420N/mm²

Yield Strength: 245N/mm²

Weight: 6.4kg/m

High tensile strength: can withstand heavy loads and pressure

Durable: made from galvanised steel, resistant to corrosion and wear

Lightweight: easy to transport and install

Steel tubes: provides strong and sturdy support for scaffolding structures

Galvanised scaffold tubes: coated with zinc for added protection and longevity

Metal tubing: suitable for various construction and industrial applications

Technical Parameters:

Attribute	Value
Name	Galvanised Scaffold Tube
Diameter	48.3mm
Surface Treatment	Galvanised
Yield Strength	245N/mm ²
Tensile Strength	420N/mm ²
Thickness	3.2mm
Application	Scaffolding

Material	Galvanised Steel
Standard	EN39
Weight	6.4kg/m

Applications:

Galvanised Scaffold Tube - The Versatile Solution for Your Construction Needs

When it comes to metal tubing for construction, the Galvanised Scaffold Tube from Bythai Scaffolding is the top choice in the market. With its high-quality materials and excellent performance, this product has become a go-to for various construction projects all over the world. With a brand name you can trust, BT01, this tube is sure to meet all your scaffolding needs.

Product Features

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Standard: EN39

Thickness: 3.2mm

Weight: 6.4kg/m

Diameter: 48.3mm

Surface Treatment: Galvanised

Application

The Galvanised Scaffold Tube is suitable for a wide range of construction applications. Its sturdy and durable design makes it perfect for use in various scaffolding systems. Whether you are working on a small residential project or a large-scale industrial project, this tube can handle it all.

Construction Scaffolding

This product is an essential component in any construction scaffolding system. It provides a strong and stable support structure for workers to safely reach and work on different levels of the construction site. With its galvanised surface treatment, this tube is resistant to corrosion, ensuring a longer lifespan and increased safety for workers.

Scaffolding System

The Galvanised Scaffold Tube is compatible with different types of scaffolding systems, making it a versatile choice for construction projects. Its standard dimensions of 48.3mm diameter and 3.2mm thickness make it easy to integrate into any scaffolding system.

Whether you are using a tube and clamp system or a ringlock system, this product will fit seamlessly.

Scaffolding Tube Price

The price of the Galvanised Scaffold Tube is competitive, ranging from \$5 to \$18 depending on the quantity and delivery location. This makes it an affordable option for both small and large construction projects. Furthermore, Bythai Scaffolding offers flexible payment terms of TT/LC to make the purchasing process more convenient for its customers.

Packaging and Delivery

For packaging, the Galvanised Scaffold Tube is bundled to ensure easy transport and handling. This minimises the risk of damage during transportation and makes it easier to store on-site. With a supply ability of 1000 tons per month, Bythai Scaffolding can meet the demands of any construction project. Delivery time is estimated at 7-15 days, ensuring timely arrival of the product to your construction site.

Conclusion

The Galvanised Scaffold Tube by Bythai Scaffolding is a reliable and cost-effective solution for all your construction scaffolding needs. Its high-quality materials, versatile application, and competitive pricing make it the go-to choice for construction professionals all over the world. Trust in the brand name, BT01, and choose this product for your next construction project. Contact Bythai Scaffolding today for more information and to place your order.

Customization:

Galvanised Scaffold Tube - Customized Service

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Surface Treatment: Galvanised

Application: Scaffolding

Tensile Strength: 420N/mm2

Diameter: 48.3mm

Name: Galvanised Scaffold Tube

Key Words: scaffolding tube price, steel tubes, scaffold aluminum tube

Packing and Shipping:

Packaging and Shipping of Galvanised Scaffold Tube

Galvanised Scaffold Tube is packaged and shipped in a way that ensures its safe delivery to the customer.

Packaging:

Each tube is carefully wrapped and protected with a layer of bubble wrap to prevent any damage during transportation. Multiple tubes are then bundled together and secured with strong straps to prevent them from shifting or getting damaged. The bundles are then placed in sturdy cardboard boxes with clear labeling to indicate the contents and handling instructions.

Shipping:

Our Galvanised Scaffold Tubes are shipped via trusted and reliable shipping companies, ensuring timely and safe delivery. We offer both domestic and international shipping options, with the necessary documentation and customs clearance procedures taken care of.

The delivery time will depend on the customer's location and chosen shipping method.

Upon delivery, our customers can expect their Galvanised Scaffold Tubes to be in perfect condition and ready for use.
