

Durability galvanized scaffolding pipe hot dip galvanized scaffolding steel tube

Our Product Introduction

for more products please visit us on bythaiscaff.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Weight: 6.4kg/m
- Name: Galvanised Scaffold Tube
- Material: Galvanised Steel
- Standard: EN39
- Surface Treatment: Galvanised
- Application: Scaffolding
- Tensile Strength: 420N/mm²
- Diameter: 48.3mm

Product Description:

Galvanised Scaffold Tube - The Ultimate Solution for Scaffolding Needs

Galvanised Scaffold Tube is a type of metal tubing specifically designed and manufactured for use in scaffolding. With a diameter of 48.3mm and a yield strength of 245N/mm², this tube is the perfect choice for any construction project.

Sturdy and Durable

Made from high-quality galvanized steel, the Galvanised Scaffold Tube is built to withstand the rigorous demands of the construction industry. Its robust construction and high strength make it suitable for use in various scaffolding applications, providing a safe and stable working platform for workers.

Versatile

The Galvanised Scaffold Tube is a versatile product that can be used for a wide range of scaffolding needs. Its standard size of 48.3mm makes it compatible with most scaffolding systems, making it an ideal choice for construction companies.

Corrosion-Resistant

One of the key features of the Galvanised Scaffold Tube is its excellent corrosion resistance. The galvanization process involves coating the tube with a layer of zinc, making it highly resistant to rust and corrosion. This ensures the longevity of the tube, making it a cost-effective choice for scaffolding needs.

Compliance with Standards

The Galvanised Scaffold Tube meets the requirements of the EN39 standard, ensuring its quality and safety. It also complies with the BS1139 standard, which is the British standard for scaffolding tubes, making it a reliable and trusted choice for scaffolding projects.

Application

The Galvanised Scaffold Tube is primarily used for scaffolding purposes, providing a stable and secure platform for workers to perform their tasks. It is also suitable for use in other construction applications, such as temporary structures, support beams, and handrails.

Conclusion

In conclusion, the Galvanised Scaffold Tube is the ultimate solution for all your scaffolding needs. Its sturdy and durable construction, versatility, corrosion resistance, and compliance with standards make it the preferred choice for the construction industry. Trust in the Galvanised Scaffold Tube for a safe and reliable scaffolding system.

Features:

Product Name: Galvanised Scaffold Tube

Application: Scaffolding

Weight: 6.4kg/m

Material: Galvanised Steel

Yield Strength: 245N/mm²

Diameter: 48.3mm

Other Features:

Seamless pipe for added strength and durability

Galvanized for corrosion resistance

48mm diameter for compatibility with tube and coupler scaffolding systems

Technical Parameters:

Attribute	Value
Name	Galvanised Scaffold Tube
Weight	6.4kg/m
Application	Scaffolding
Thickness	3.2mm
Material	Galvanised Steel
Standard	EN39
Yield Strength	245N/mm ²
Tensile Strength	420N/mm ²
Surface Treatment	Galvanised
Diameter	48.3mm
Keyword	Value
Steel and Pipe	Galvanised Steel

Scaffolding Tube Price	Variable, depending on quantity and supplier
Seamless Pipe	No, welded

Applications:

Galvanised Scaffold Tube – Bythai Scaffolding BT01

Welcome to Bythai Scaffolding, the leading supplier of high-quality scaffolding solutions in China. Our Galvanised Scaffold Tube, model number BT01, is the perfect choice for all your construction projects. Made from top-grade galvanised steel and meeting EN39 standard, our scaffold tube is highly durable and offers exceptional strength for your scaffolding needs.

Product Attributes:

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18 per piece

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000 tons per month

Application and Usage:

Our Galvanised Scaffold Tube is designed for use in various scaffolding applications, making it an essential component for any construction project. It is commonly used for supporting workers, materials, and equipment at different heights, ensuring safety and stability during the construction process. Our scaffold tube is suitable for both indoor and outdoor use, making it a versatile choice for all types of construction projects.

Key Features:

High Quality: Made from top-grade galvanised steel, our scaffold tube offers superior strength and durability.

Easy to Assemble: Our scaffold tube is easy to assemble and dismantle, making it a convenient choice for any construction site.

Corrosion Resistant: The galvanised coating on our scaffold tube provides excellent protection against corrosion, ensuring a longer lifespan.

Standard Size: Our scaffold tube has a diameter of 48mm, which is the standard size for most scaffolding systems.

Versatile: Our scaffold tube can be used for various scaffolding applications, including construction, maintenance, and repair work.

Cost-Effective: With a price range of \$5-\$18 per piece, our scaffold tube offers excellent value for money.

Why Choose Bythai Scaffolding?

Bythai Scaffolding is committed to providing our customers with top-quality products at competitive prices. Our Galvanised Scaffold Tube is no exception. We take pride in our strict quality control measures and ensure that all our products meet international standards. With our fast delivery times and flexible payment options, we make it convenient for you to get the scaffolding solutions you need. Trust us to be your reliable supplier for all your construction scaffolding needs.

So why wait? Contact us now to get a quote for our Galvanised Scaffold Tube and take your construction projects to new heights with Bythai Scaffolding!

Customization:

Galvanised Scaffold Tube - Customized Service

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Tensile Strength: 420N/mm²

Material: Galvanised Steel

Diameter: 48.3mm

Surface Treatment: Galvanised

Name: Galvanised Scaffold Tube

Customized Services for Galvanised Scaffold Tube

At Bythai Scaffolding, we understand that every project has unique requirements. That's why we offer customized services for our Galvanised Scaffold Tube to meet your specific needs.

Scaffolding Tubes Galvanized

Our Galvanised Scaffold Tube is made from high-quality galvanized steel, ensuring durability and strength for your scaffolding needs. Scaffolding Accessories

In addition to our Galvanised Scaffold Tube, we also offer a wide range of scaffolding accessories to complete your project, including couplers, clamps, and base plates.

Galvanized Scaffold Tube 48.3mm

Our Galvanised Scaffold Tube is available in a standard diameter of 48.3mm, making it compatible with most scaffolding systems. Customized Service

We offer customized services to meet your specific project requirements. This includes custom lengths, diameters, and surface treatments for our Galvanised Scaffold Tube.

Galvanized Steel Tubes

Our Galvanised Scaffold Tube is made from high-quality galvanized steel, ensuring rust resistance and longevity for your scaffolding needs.

Fast Delivery Time

With a supply ability of 1000 tons per month, we can ensure a fast delivery time of 7-15 days for our Galvanised Scaffold Tube. SGS Certification

Our Galvanised Scaffold Tube has been certified by SGS, ensuring the highest quality and safety standards for your project.

Competitive Pricing

We offer competitive pricing for our Galvanised Scaffold Tube, with prices ranging from \$5 to \$18 per piece.

Payment Flexibility

We accept multiple payment methods, including TT and LC, to offer flexibility and convenience for our customers.

Choose Bythai Scaffolding for your Galvanised Scaffold Tube needs and experience our high-quality products and exceptional customized services. Contact us today for a quote!

Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping

Once your order for Galvanised Scaffold Tubes has been processed and manufactured, they will be carefully packaged to ensure safe delivery to your desired location.

Packaging:

The tubes will be bundled and shrink-wrapped together to prevent any damage during transit.

Each bundle will be labeled with the product name, size, and quantity for easy identification.

Additional protective padding and wrapping will be added to the bundles as needed.

The bundles will then be placed in sturdy, durable packaging boxes.

Shipping:

Our Galvanised Scaffold Tubes can be shipped worldwide using various shipping methods, depending on your location and preferences.

For domestic orders, we offer standard ground shipping or expedited shipping options.

For international orders, we offer air freight, ocean freight, or express shipping options.

All shipments will be trackable and you will receive a tracking number once your order has been shipped.

Our team will ensure that your order is shipped in a timely and efficient manner.

With our careful packaging and reliable shipping options, you can trust that your Galvanised Scaffold Tubes will arrive safely and on time.

Thank you for choosing our product!
