

## Aluminum Ringlock system Scaffolding Ringlock Scaffold Connector

Our Product Introduction

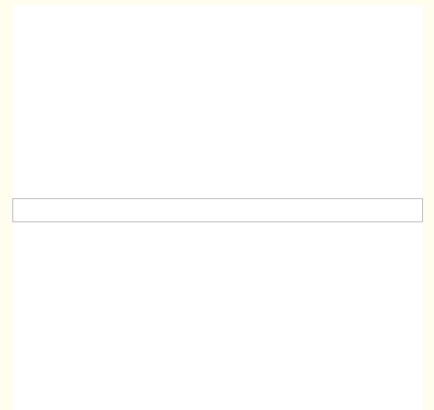

### Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS
- Model Number: BS201
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: L/C, T/T

### Product Specification

- Bending Radius: >2.5D
- Color: Silver
- Corrosion Resistance: High
- Easy To Assemble: Yes
- Elongation: >20%
- Material: Aluminum
- Origin: China
- Packing: Bundles Or In Bulk
- Standard: EN39/BS1139
- Surface Treatment: Hot Dipped Galvanised
- Thickness: 2.0-4.0mm
- Type: Scaffolding Pipe
- Usage: Indoor And Outdoor
- Yield Strength: 245N/mm2

## Product Description

**High strength and durability:** Aluminum alloy has excellent strength and corrosion resistance, ensuring that the scaffold remains stable and durable in various environments. Whether it is an outdoor construction site or indoor decoration, it can easily handle various construction needs.

**Easy assembly and disassembly:** The ring lock system design makes the assembly and disassembly of the scaffold very simple, without the need for a large number of tools, and the entire construction process can be completed quickly. It helps to improve the progress of the project and reduce the construction period.

**Safety:** Aluminum alloy ring-lock scaffolding has undergone strict quality control and safety testing to ensure stability and safety during use, provide workers with a reliable working platform, and reduce the risk of accidents.

**Economical and energy-saving:** Aluminum alloy materials not only have high strength, but also have excellent corrosion resistance, extending product service life and reducing maintenance and replacement costs.

**Application fields:** Aluminum alloy ring lock system scaffolding is widely used in construction, bridge engineering, petrochemical industry, power facility maintenance and other fields. Whether it is a large construction site or a small construction project, it can provide flexibility and versatility to provide efficient and reliable construction solutions.

### Aluminum Ringlock Standard

SIZE (MM)	LENGTH(MM)	N.W(KGS)
48.3*4.0	500	1.38
48.3*4.0	1000	2.33
48.3*4.0	1500	3.27
48.3*4.0	2000	4.22
48.3*4.0	2500	5.17
48.3*4.0	3000	6.12
48.3*4.0	3500	7.07
48.3*4.0	4000	8.02

### AFQ

1. : What types of scaffolding services does your company provide?

We provide many types of scaffolding services, including cantilever scaffolding, portal scaffolding, cantilever scaffolding, etc., as well as disc systems, steel treads, fasteners, steel supports and other products.

2. :What safety standards does your company's scaffolding comply with?

We strictly follow international, national and local safety standards to ensure that all scaffolding operations comply with relevant regulations and safety requirements.

3.: How to get a quotation from your company?

You can submit project details through the online quotation form on our official website, or contact our sales team directly for detailed quotation information.

4. :What successful scaffolding project experience does your company have?

We have been involved in many successful projects over the past three years including multi-storey buildings, bridge projects and more. Please refer to our project case page for specific cases.

5: Does your company provide services for customized scaffolding products?

Yes, we can provide customized scaffolding products according to customers' specific needs, including customization of size, shape and load capacity.
