

Lightweight Aluminium Scaffolding Plank with Multiple Applications

Our Product Introduction

for more products please visit us on bythaiscaff.com

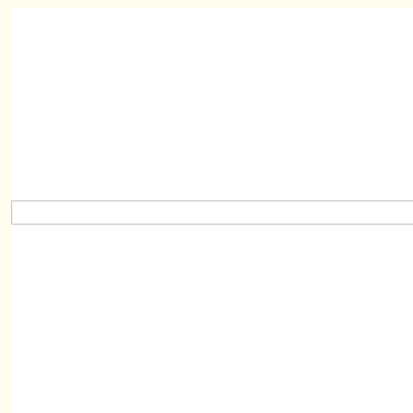

Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS
- Model Number: BS204
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Features: High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional
- Type: Planks
- Material: Aluminum
- Packing: Container
- Standard: EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
- Oem: Available
- Application: Scaffolding System
- Size: Various Sizes Available
- Highlight: **Lightweight Aluminium Extension Plank,**

Product Description

Product Description:

Aluminum planks - The Ultimate Construction Solution

As a leading manufacturer of innovative construction equipment, our Aluminum planks is designed to meet the highest standards of safety, durability, and efficiency. Made from high-quality aluminum material, our Ringlock System is the perfect choice for all your construction, maintenance, and repair needs.

Product Overview

Our Aluminum planks follows making it a reliable and trustworthy choice for any construction project. With easy installation, high load capacity, and durable design, our Ringlock System is a must-have for any construction site.

Material

Made from high-quality aluminum, our Ringlock System offers superior strength and durability. The use of aluminum also makes it lightweight, making it easy to transport and install on site.

Easy Installation

Our planks is designed for easy installation, saving you time and effort. The unique locking mechanism allows for quick and secure connections, ensuring a strong and stable structure.

Plank Accessories

With our planks, you can easily add plank accessories for increased safety and convenience. The plank accessories provide a stable platform for workers, allowing them to work efficiently and safely at height.

Construction Safety

Safety is our top priority, and our planks is designed with this in mind. The sturdy structure and secure connections ensure the safety of workers on site, reducing the risk of accidents and injuries.

High Load Capacity

Our planks is capable of supporting heavy loads, making it suitable for a wide range of construction projects. With its high load capacity, you can trust our Ringlock System to provide a strong and stable foundation for your building.

Durable

Made from high-quality materials and designed to withstand harsh weather conditions, our Ringlock System is highly durable and long-lasting. This makes it a reliable choice for both short-term and long-term construction projects.

OEM Availability

As a customer-oriented company, we offer OEM services to meet your specific requirements. Our team of experts can work with you to customize our planks according to your needs, ensuring maximum satisfaction.

Choose Aluminum planks for Your Next Project

In conclusion, our Aluminum planks is the perfect solution for all your construction needs. With its easy installation, plank accessories, construction safety, high load capacity, and durability, it is the ultimate choice for any construction project. Contact us today to learn more about our planks and how it can benefit your next project.

Technical Parameters:

Attribute	Value
Size	Various Sizes Available
Oem	Available
Type	Ringlock
origin	China
Usage	Construction, Maintenance, Repair
Features	High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional
Packing	Container
Application	Scaffolding System
Material	Aluminum
Key Features	Description
Corrosion-resistant	The Aluminum planks is made from aluminum which is highly resistant to corrosion, making it suitable for use in various weather conditions.

Flexible and detachable	The system is designed to be flexible and detachable, allowing for easy installation and dismantling to meet different project requirements.
Easy installation	The aluminum components are lightweight and can be easily assembled without the need for specialized tools, making installation quick and efficient.
Light weight	The use of aluminum in the system makes it lightweight and easy to handle, reducing labor and transportation costs.
