

Modular Ringlock System Scaffolding For Construction Needs

Our Product Introduction

for more products please visit us on bythaiscaff.com

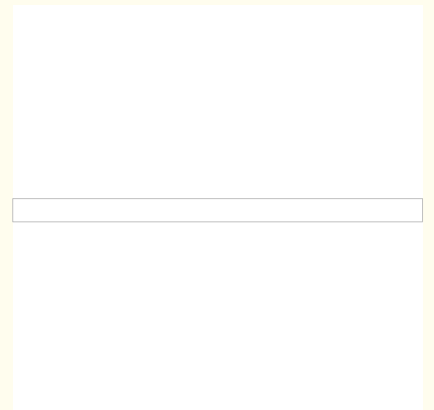

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Surface Treatment: Hot-dip Galvanized
- Material: Q235 Steel
- Application Scenarios: Architecture
- Shipping Origin: China
- Product Name: Ringlock System
- Warranty: 2 Years
- Highlight: **Modular Ringlock System Scaffolding,
Corrosion Resistant Ringlock System
Scaffolding
, Construction Aluminum Ringlock Scaffolding**

Product Description:

Modular Scaffolding System Ringlock Scaffolding S Top Choice For Construction Needs

Product Overview of Ringlock System Scaffolding

The Ringlock System Scaffolding is a versatile and durable product that is widely used in the construction industry. It is a type of modular scaffolding system that consists of pre-fabricated components, making it easy to assemble and disassemble. This product is known for its high strength, stability, and flexibility, making it the preferred choice for many construction projects.

Product Name: Ringlock System

The product name, Ringlock System, is derived from the unique design of the scaffolding system. It features rosette connections that allow for quick and easy installation, making it one of the fastest scaffolding systems on the market. This system is also known as Layher Scaffolding, named after the German company Layher, which first developed it.

Shipping Origin: China

The Ringlock System Scaffolding is manufactured in China, a country known for its high-quality and cost-effective production. This ensures that the product is accessible and affordable for construction projects all over the world. The product is shipped from China to various countries, making it a global choice for scaffolding needs.

Application Scenarios: Architecture

The Ringlock System Scaffolding is designed to meet the needs of various construction projects, but it is particularly well-suited for architectural projects. Its versatility allows it to be used in a wide range of applications, including building construction, renovation, and maintenance. It provides a safe and efficient solution for working at different heights, making it an essential tool for architects.

Warranty: 2 Years

Key Features and Benefits

Corrosion-Resistant Ringlock: The Ringlock System Scaffolding is made of high-quality steel that is hot-dip galvanized, making it resistant to corrosion and ensuring its durability.

Ringlock Rosette: The unique rosette connection design allows for quick and easy installation, making the scaffolding system one of the fastest to set up.

Modular Scaffolding: This product is designed to be modular, allowing for easy assembly and disassembly, making it highly flexible and adaptable to different project needs.

Scaffolding System: The Ringlock System is a complete scaffolding system that includes all the necessary components for safe and efficient construction work at different heights.

Scaffolding Tower: The versatility of the Ringlock System allows for the construction of scaffolding towers, providing a stable and secure platform for workers to perform their tasks.

In conclusion, the Ringlock System Scaffolding is a top-of-the-line product that offers a reliable and efficient solution for construction projects. Its high-quality materials, unique design, and versatility make it a popular choice for architects and construction professionals around the world. With a 2-year warranty and hot-dip galvanization, this product is built to last and withstand the toughest conditions. Trust in the Ringlock System Scaffolding for all your scaffolding needs.

Technical Parameters:

Technical Parameters	Description
Product Name	Ringlock System
Material	Q235 Steel
Surface Treatment	Hot-dip Galvanized
Warranty	2 Years
Shipping origin	China
Application Scenarios	Architecture
Key Features	Hot-dip galvanized ringlock for corrosion resistance, cost-effective ring lock system, compatible with layher scaffolding, easy to assemble and dismantle, versatile and flexible scaffolding system

Applications:

Introduction to Ringlock System Scaffolding

Ringlock System Scaffolding, also called Scaffold Coupler System, is a type of construction equipment that provides a safe and efficient solution for workers to access and work at heights. It consists of vertical standards, horizontal ledgers, diagonal braces, and steel planks, all connected by hot-dip galvanized ringlock connectors.

As a leading Ringlock Scaffold Supplier, Bythai provides high quality scaffolding systems that are widely used in various construction projects around the world.

Application Scenarios

Ringlock System Scaffolding is suitable for a wide range of applications in the construction industry. Some of the common scenarios where it can be used include:

[Building Bridges and Tunnels](#)

[High-rise Buildings](#)

[Industrial Plants](#)

[Stadiums and Arenas](#)

[Power Plants](#)

[Refineries](#)

Features and Benefits

Bythai's Ringlock System Scaffolding offers several advantages over traditional scaffolding methods:

High Quality Scaffolding: Our scaffolding systems are made of high-grade steel and undergo strict quality control procedures to ensure durability and safety.

Multi-purpose Scaffolding: The modular design of our Ringlock System allows for easy assembly and disassembly, making it suitable for various construction projects.

Hot-dip Galvanized: The scaffolding components are coated with a layer of hot-dip galvanization, providing protection against rust and corrosion.

Easy to Transport and Store: The lightweight and compact design of our scaffolding system makes it easy to transport and store, saving time and cost.

Quick Installation: With its simple and efficient design, our scaffolding system can be installed quickly, reducing labor and construction time.

Safe and Stable: The ringlock connectors provide a strong and stable connection between the components, ensuring the safety of workers at heights.

Shipping and Warranty

Our Ringlock System Scaffolding is shipped directly from China to any location worldwide. We guarantee a prompt delivery within 10-15 days after receiving the payment.

We also offer a 2-year warranty on all our products, giving our customers peace of mind and confidence in their purchase.

Conclusion

Bythai's Ringlock System Scaffolding is a versatile and reliable solution for construction projects of all sizes. With its high-quality materials, efficient design, and easy installation, it is the preferred choice for contractors and workers around the world.
