Product Description:

Base Jack Scaffolding

Base Jack Scaffolding is a high-quality product that is used for construction and maintenance projects. It is a crucial component in any scaffolding system, providing a stable and sturdy base for workers to perform their tasks safely and efficiently.

Color

The Base Jack Scaffolding comes in a sleek and professional silver color, making it easily recognizable and visible on any job site. The color also gives it a modern and clean look, making it an attractive addition to any construction site.

Material

Made from durable and strong steel, the Base Jack Scaffolding is built to withstand heavy loads and harsh environments. The use of steel makes it a reliable and long-lasting product, ensuring that it can be used for multiple projects without any wear or tear.

Packing

The Base Jack Scaffolding is carefully packed in a container for easy transportation and storage. This allows for convenient and efficient handling of the product, making it ideal for both small and large construction companies.

Warranty

To guarantee the quality of our product, we offer a 2-year warranty on the Base Jack Scaffolding. This gives our customers peace of mind and confidence in their purchase, knowing that they are getting a reliable and durable product.

Surface Treatment

The Base Jack Scaffolding is available in three surface treatments: painted, electro-galvanized, and hot-dip galvanized (HDG). These treatments not only enhance the appearance of the product but also provide added protection against rust and corrosion, ensuring its longevity.

Adjusting Nut

One of the key features of the Base Jack Scaffolding is its adjusting nut. This allows for easy and precise adjustment of the height of the scaffolding, making it suitable for a variety of different construction projects. The nut is also made from high-quality steel, ensuring its durability and reliability.

Load-bearing Base

The Base Jack Scaffolding is designed to be a load-bearing base, capable of supporting heavy loads and providing a stable foundation for workers. This is crucial for ensuring the safety of workers and the success of any construction project.

Convenient and Easy to Use

The Base Jack Scaffolding is designed to be convenient and easy to use. Its compact size and lightweight nature make it easy to transport and assemble on site. Its simple design also allows for quick and easy installation, saving time and effort for workers.

Safety

Safety is our top priority, which is why the Base Jack Scaffolding is designed with safety features in mind. Its sturdy base and adjustable height ensure that workers can work at a safe and comfortable height, reducing the risk of accidents and injuries.

Versatile

The Base Jack Scaffolding is a versatile product that can be used for a wide range of construction and maintenance projects. Whether it's for building, painting, or any other task, the Base Jack Scaffolding is a reliable and essential tool for any construction site.

In conclusion, the Base Jack Scaffolding is a high-quality, durable, and versatile product that is designed to make construction and maintenance projects safer and more efficient. Its convenient and easy-to-use features, along with its adjustable height and load-bearing base, make it an essential tool for any construction company. With a 2-year warranty and three surface treatment options, the Base Jack Scaffolding is a reliable and long-lasting investment for any construction project.

Features:

- Product Name: Base Jack Scaffolding
- Surface Treatment: Painted/ Electro-Galvanized/ HDG
- Material: Steel

- Color: Silver
- High quality
- Jack
- Screw Jack
- Adjustable
- Sturdy

Technical Parameters:

Technical Parameters	Base Jack Scaffolding
Surface Treatment	Painted/ Electro-Galvanized/ HDG
Usage	Building Construction
Color	Silver
Material	Steel

Packing	Container
Warranty	2 Year
Product Name	Base Jack Scaffolding
MOQ	1000
Scaffolding Support Type	Adjustable Height
Scaffolding Accessories	Building Base

Applications:

Base Jack Scaffolding - The Perfect Solution for Your Construction Needs

Brand Name: Scaffolding Screw Jack

Model Number: BM212

Place of Origin: China Tianjin

Minimum Order Quantity: 1500

Price: \$4.5 - \$8.5

Delivery Time: 10-25 days

Surface Treatment: Painted/ Electro-Galvanized/ HDG

Usage: Building Construction

Packing: Container

MOQ: 1000

Introduction

Base Jack Scaffolding is a highly functional and reliable scaffolding base that is used in construction projects. It is designed to provide a stable and safe foundation for scaffolding structures, making it an essential accessory for any construction site.

Application and Scenarios

Base Jack Scaffolding is suitable for a wide range of construction applications, including building construction, bridge construction, and maintenance work. It is commonly used in scenarios where scaffolding structures need to be erected and adjusted to different heights, such as:

High-rise building construction

Renovation and repair work

Bridge construction and maintenance

Industrial projects

Product Features

Scaffolding Base: The base jack scaffolding is designed to provide a strong and stable foundation for scaffolding structures. It is equipped with a load-bearing base plate that can support heavy loads and prevent the scaffolding from sinking.

Adjustable Function: The base jack scaffolding has an adjustable function that allows it to be adjusted to different heights. This makes it suitable for use on uneven surfaces and in situations where the scaffolding needs to be raised or lowered to different levels.

Construction Safety: The base jack scaffolding is made from high-quality materials and is designed to meet safety standards. It provides a secure and stable base for workers to perform their tasks, ensuring their safety while working at heights.

Easy to Use: The base jack scaffolding is easy to assemble and disassemble, making it a convenient and time-saving option for construction projects. It can be easily adjusted and moved to different locations, providing flexibility and efficiency on the job site.

Durable: Made from high-quality materials, the base jack scaffolding is built to withstand harsh weather conditions and heavy loads. It is a long-lasting solution that can withstand the wear and tear of construction projects.

Customizable: The base jack scaffolding can be customized to meet specific project requirements. From the size and height to the surface treatment, it can be tailored to fit the needs of different construction projects.

Cost-effective: The base jack scaffolding is a cost-effective solution for construction projects. Its durability and reusability make it a cost-effective investment for long-term use, saving time and money on future projects.

Why Choose Base Jack Scaffolding?

Base Jack Scaffolding stands out among other scaffolding bases due to its high-quality materials, customizable options, and adjustable function. It provides a safe and stable foundation for scaffolding structures, ensuring the safety of workers and the success of construction projects.
