

Factory Supplied Scaffolding Catwalk Metal Scaffold Platform Scaffold Board Steel Planks

Our Product Introduction

for more products please visit us on bythaiscaff.com

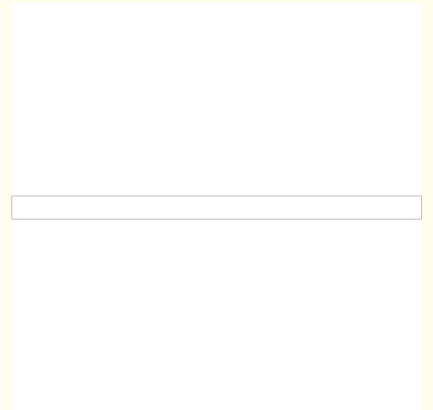

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 15.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping

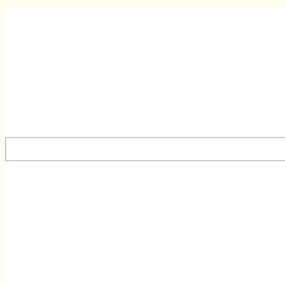

Product Specification

- Packaging: Container
- Usage: Scaffolding
- Material: Steel
- Place Of Shipment: China
- Length: Customized
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Highlight: **Metal Scaffold Platform Board, Factory Supplied Board Steel Planks, Scaffolding Board Steel Planks**

Product Description

Product Description:

The Scaffolding Plank is a premium product designed for various construction and maintenance applications, providing a safe and reliable working platform for professionals. Customizable in length to meet the specific demands of each project, this steel plank is a versatile solution for temporary flooring and access needs on construction sites. The superior construction and flexible design make it an ideal choice for a wide range of scaffolding systems.

Manufactured with precision, these steel planks are available in different surface finishes to cater to various environmental conditions and customer preferences. The pre-galvanized option offers a layer of protection against corrosion, making it suitable for indoor applications or environments with minimal exposure to harsh weather. The hot-dip galvanized version provides a thicker, more resilient zinc coating for superior rust resistance, ideal for outdoor or industrial settings. Alternatively, the spray plastic surface option adds an extra layer of durability and slip resistance, enhancing safety during use.

One of the standout features of this scaffolding plank is the steel plank with hooks, which facilitates secure attachment to the scaffold structure, ensuring stability and safety. This feature is paramount in preventing plank movement and potential accidents, making it a preferred choice for construction professionals. The steel catwalk scaffold design enables workers to move freely and carry materials across the plank, optimizing workflow and efficiency on the job site.

The bs1139 steel plank specification ensures that the product meets the stringent British Standards for structural steel used in scaffolding. This certification is a testament to the quality and safety of the scaffolding plank, giving users peace of mind that the product adheres to internationally recognized safety standards. With the steel plank 230 model, customers can expect a robust and reliable platform that can withstand the rigors of construction work while providing ample space for personnel and materials.

Each Scaffolding Plank is carefully packaged in containers for secure and efficient transportation, ensuring that the product arrives at the destination in excellent condition. The container packaging also facilitates easy handling and storage, reducing the risk of damage during transit and simplifying the logistics process for our customers.

The place of shipment for this exceptional scaffolding plank is China, where it is manufactured with the highest level of craftsmanship and attention to detail. China's advanced manufacturing capabilities and stringent quality control measures guarantee that each plank meets our high standards before it is shipped to customers worldwide.

The usage of these Scaffolding Planks is diverse, making them suitable for various industries, including construction, renovation, painting, and maintenance. Whether it is for creating a temporary walkway, an elevated work platform, or an access point, the scaffolding plank proves to be a critical component in ensuring that work can be conducted safely and efficiently at heights.

In conclusion, the Scaffolding Plank with its customizable length, choice of surface finishes, secure steel plank with hooks design, bs1139 certification, and robust steel plank 230 model, offers an unrivaled combination of safety, durability, and adaptability. Packaged securely and shipped from China, this scaffolding solution stands out as a premium product for construction professionals seeking a reliable and safe working platform. Embrace the blend of quality and innovation with our Scaffolding Plank, a product designed to support your projects from the ground up.

Technical Parameters:

Attribute	Detail
Surface	Pre-galvanized/Hot Dip Galvanized/Spray Plastic
Material	Steel
Place of Shipment	China
Packaging	Container
Usage	Scaffolding
Length	Customized
