

Steel Ringlock Scaffolding With Q235 Steel Industrial Design

Our Product Introduction

for more products please visit us on bythaiscaff.com

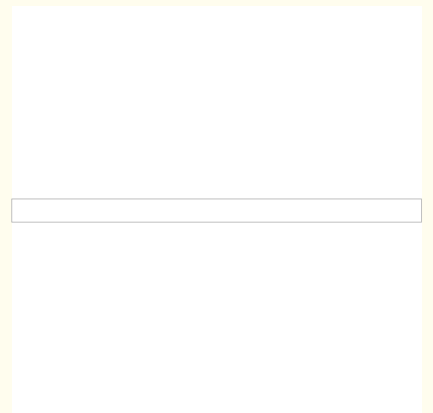

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS ISO
- Model Number: BT203
- Minimum Order Quantity: 1000
- Price: 10.8-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

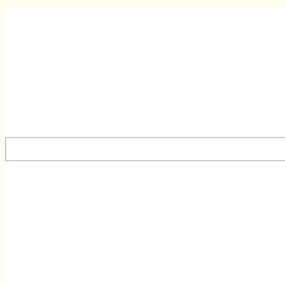

Product Specification

- Product Name: Ringlock System
- Application Scenarios: Architecture
- Warranty: 2 Years
- Shipping Origin: China
- Application: Building
- Material: Q235 Steel
- Design Style: Industrial
- Surface Treatment: Hot-dip Galvanized
- Highlight: **Industrial Design Ringlock Scaffolding,
Steel Industrial Design Scaffolding,
Q235 Steel Ringlock Scaffolding**

Product Description

Product Description:

With a hot-dip galvanized surface treatment, this scaffolding Ring Lock is highly resistant to corrosion and rust, making it ideal for use in challenging outdoor environments. Its high-quality materials and construction ensure that it can withstand heavy loads and provide reliable support for workers and equipment.

Whether you're working on a commercial building, residential project, or industrial construction site, the Ringlock System Scaffolding is an excellent choice for your scaffolding needs. Its versatile design and easy assembly make it a popular choice among contractors and construction professionals.

One of the key benefits of the Ringlock System Scaffolding is its advanced Ringlock technology. This innovative system features a unique locking mechanism that provides a secure and stable connection between the scaffold components. This ensures maximum safety and stability, even when working at great heights.

Another advantage of the Ringlock System Scaffolding is its industrial design style. This rugged and durable scaffolding system is built to withstand the toughest construction environments and provide reliable support for workers and equipment. Its sleek and modern design also makes it a popular choice for architects and designers looking for a scaffolding system that is both functional and aesthetically pleasing.

In summary, the Ringlock System Scaffolding is a high-quality scaffold coupler system that is designed for industrial architecture and building applications. Its hot-dip galvanized surface treatment, advanced Ringlock technology, and versatile design make it an excellent choice for contractors and construction professionals who demand the best in scaffolding systems.

Features:

Product Name: Ringlock System Scaffolding

Surface Treatment: Hot-dip Galvanized

Shipping Origin: China

Place of Origin: Tianjin China

Warranty: 2 Years

Design Style: Industrial

Features:

Innovative Ring Lock Design

Easy and quick assembly and disassembly

High load-bearing capacity

Flexible and versatile in application

Cost-Effective Ring Lock System

Can be used for various construction projects

Hot-dip galvanized for increased durability and longevity

Complies with international safety standards

Technical Parameters:

Product Attribute	Value
Product Name	Ringlock System
Place of Origin	Tianjin China
Shipping Origin	China
Design Style	Industrial
Warranty	2 Years
Surface Treatment	Hot-dip Galvanized
Material	Q235 Steel
Application	Building
Application Scenarios	Architecture
Product Description	Innovative Ring Lock Design, Versatile Ringlock Scaffold, hot dip galvanized ringlock

Applications:

The Ringlock System is a versatile scaffolding product that can be used for various building applications. It is suitable for both small and large scale projects, including commercial and residential buildings, bridges, and industrial facilities. The Ringlock System is also ideal for use in situations where traditional scaffolding is not practical or effective.

Bythai's Ringlock System is made from high-quality Q235 steel and is SGS ISO certified. This ensures that the product is durable, safe, and able to withstand even the most challenging construction environments. The Ringlock System is also covered by a 2-year warranty, giving customers peace of mind that they are investing in a reliable and long-lasting product. When it comes to logistics, the Ringlock System is packaged in bundles and can be delivered in a timely manner, with a delivery time of 10-15 days. Payment terms can be made through TT/TC, making it easy and convenient for customers to purchase this product. Overall, Bythai's BT203 Ringlock System Scaffolding is an excellent choice for construction companies looking for a cost-effective and reliable scaffolding solution. With its advanced Ringlock technology, compliance with scaffolding standards, and high-quality material, this product is sure to meet the needs of any construction project.
