

Putlog Coupler Hot Dip Galvanized Steel Scaffold Fitting for Fixing Board on Construction Scaffolding BYTHAI

Our Product Introduction

for more products please visit us on bythaiscaff.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: SCA-COU-001
- Minimum Order Quantity: 1000
- Price: 0.6-1.2
- Packaging Details: In bundles
- Delivery Time: 15-30 Working Days

Product Specification

- Surface Treatment: Galvanized, Hot Dip Galvanized, or Anti-rust Liquid, Hot Dip Gal., Hot Dip Galvanize/Zinc Plating Available
- Application: Construction, Supporting Scaffolding System, for Connecting The Scaffolding Pipe, scaffolding, connect The Scaffolding Tube
- Type: Scaffolding Parts, Korean / British, ALL Type, swivel Coupler, scaffold Coupler
- Color: Silver, white Zinc, Yellow, golden, white / Yellow
- Size: 48.3*48.3mm, 73mm, 50mm, See Table For Details.
- Product Name: Scaffolding Right Angle Coupler, Drop Forged Double Coupler, Scaffolding High Load Capacity German Type Coupler, forged Scaffolding Clamp Swivel Coupler Used Scaffold Cuplock
- Standard: EN74, BS1139, EN74/BS1139, DIN, JIS And

Product Description

Product Description:

The Scaffolding Coupler is an essential component in the construction and building industry, playing a pivotal role in the assembly and structural integrity of scaffold systems. Meeting the demands of various construction projects, this product is designed to provide a secure and reliable connection between scaffold tubes, ensuring the safety of workers and the durability of the scaffold structure. With a Minimum Order Quantity (MOQ) of 1000 units, this product is ideal for large scale construction projects or for suppliers looking to stock high-quality scaffold connection tools.

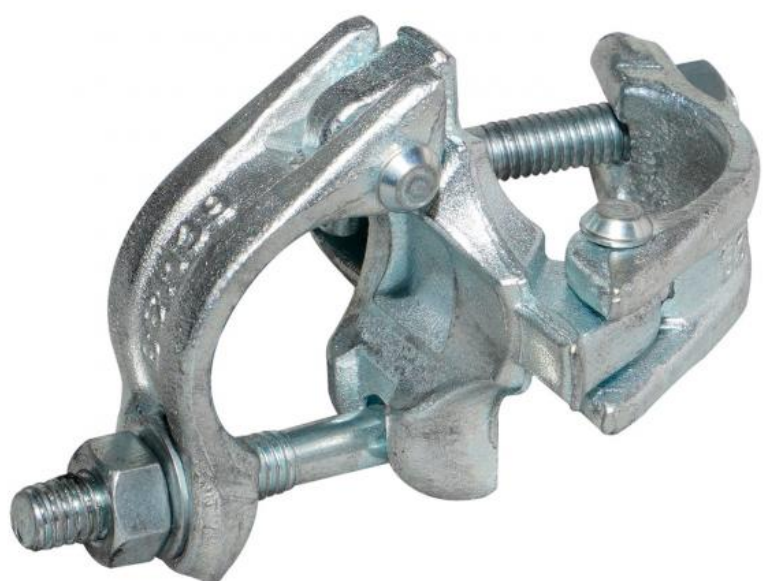

Our Scaffolding Coupler is manufactured with a keen emphasis on strength and reliability. It is crafted to exhibit high strength, capable of withstanding the rigors of construction environments and the stresses associated with supporting heavy loads. The robust design ensures that the couplers maintain their integrity and functionality, even under extreme conditions, making them a dependable choice for construction professionals.

The coupler's surface is treated with a galvanization process, which not only imparts a sleek silver color but also provides an added layer of protection against corrosion and wear. This surface treatment ensures a longer lifespan for the product, reducing the need for frequent replacements and thereby offering cost savings over time. The galvanization process also contributes to the maintenance of the coupler's aesthetic appeal, ensuring that it remains visually consistent with other scaffold components.

Technical Parameters:

Attribute	Detail
Name	Scaffolding Coupler
Package	Container
Surface Treatment	Galvanized
Feature	High Strength
Application	Construction
Standard	EN74-1
Color	Silver
MOQ	1000
Material	Steel

Packing and Shipping:

Product Packaging for Scaffolding Coupler:

The couplers are then securely packaged in sturdy cardboard boxes, with each box containing a set quantity depending on the order size.

Shipping Information for Scaffolding Coupler:

The packed cardboard boxes are loaded onto pallets and shrink-wrapped to ensure stability during transportation. The pallets are then loaded into the shipping container or truck, depending on the mode of transport. The shipping method (ground, air, or sea) will be selected based on the customer's preference, destination, and time constraints. Each shipment is accompanied by a packing slip and, if required, a commercial invoice. All necessary precautions are taken to ensure that the scaffolding couplers reach their destination in perfect condition. We advise customers to inspect the packages upon arrival and report any damages immediately for prompt resolution.

FAQ

1. Who are we?

We are based in Hunan, China, starting from 2022, selling to the Middle East(40.00%), Southeast Asia(30.00%), and South America (20.00%). There are a total of about 11-50 people in our office.

2. What types of scaffolding services does your company provide?

We provide many types of scaffolding services, including cantilever scaffolding, portal scaffolding, cantilever scaffolding, etc., ringlock systems, steel treads, fasteners, steel supports, and other products.

3. What safety standards does your company's scaffolding comply with?

We strictly follow international, national, and local safety standards to ensure that all scaffolding operations comply with relevant regulations and safety requirements.

4. How to get a quotation from your company?

You can submit project details through the online quotation form on our official website, or contact our sales team directly for detailed quotation information.

5. What successful scaffolding project experience does your company have?

We have been involved in many successful projects over the past three years including multi-story buildings, bridge projects, and more. Please refer to our project case page for specific cases.

6. Does your company provide services for customized scaffolding products?

Yes, we can provide customized scaffolding products according to the customer's specific needs, including size, shape, and load capacity customization.

7. how can we guarantee quality?

Always a pre-production sample before mass production; Always final Inspection before shipment;

8. what can you buy from us?

scaffolding, scaffolding tube, steel plank, ringlock, Ladders, Couplers, etc.

9. why should you buy from us not from other suppliers?

we have a group of staff and a technical team with rich scaffolding experience, we have many years of engineering site visits and exchange experience, professionally to provide customers with all kinds of scaffolding consultation and program

recommendations.

10. what services can we provide?

Accepted Delivery Terms: FOB, CFR, CIF, EXW, DDU;

Accepted Payment currency: USD, HKD, CNY;

Accepted Payment Type: T/T,L/C, ,PayPal, Western Union;

Language Spoken: English, Chinese, Spanish
